Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification*, *Index to the U.S. Patent Classification*, *Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

MAINTENANCE FEE PAYMENTS

The Patent and Trademark Office (PTO) has received inquiries concerning the PTO'S refusal to accept payment of a maintenance fee in two fact situations.

A. The PTO has refused to accept authorization to charge a maintenance fee and/or surcharge to a Deposit Account unless the paper containing the authorization to charge was timely filed and included an authorizing signature. Upon reconsideration, this requirement for a signature to authorize a maintenance fee and/or surcharge to be charged to a Deposit Account is abolished since papers concernng maintenance fees are not considered to be papers filed in the application under 37 CFR 1.33(a).

Request for refunds due to the above-noted change in practice should be directed to the Refund Section of the Accounting Division of the Office of Finance.

B. The PTO has refused to accept the maintenance fee and surcharge specified in a Maintenance Fee Reminder mailed prior to April 17, 1989, but paid on or after April, 17, 1989. New fees effective April 17, 1989, raised the amount due for maintenance fees and surcharges. However, Maintenance Fee Reminders mailed prior to that date reflected the old fees. Some patentees have submitted the amount requested on the Maintenance Fee Reminder only to have the PTO refuse to accept those fees due as being insufficient. Often, the PTO notice that the amount tendered is insufficient is received after the expiration date of the patent under 37 CFR 1.362(g).

The amount of the maintenance fee required by statute is based upon the date of effective receipt in the PTO. The amount of the surcharge needed for payment during the six month grace period is set by regulation. The PTO will accept the payment submitted under the following conditions:

(1) the total amount submitted for the maintenance fee and surcharge was at least the amount of the maintenance fee required by statute based upon the date of receipt in the PTO and was the total amount requested in the Maintenance Fee Reminder for the patent;

(2) the amount submitted was paid prior to expiration of the patent under 37 CFR 1.362(g);

(3) the insufficiency in payment of the maintenance fee and surcharge is discovered after expiration of the patent under 37 CFR 1.362(g); and

(4) a petition under 37 CFR 1.183 is promptly filed after discovery of the insufficiency in payment of the maintenance fee and surcharge. The petition must request (a) that the amount previously paid be accepted as the maintenance fee required by statute; (b) that the amount submitted above that required for the maintenance fee be accepted as the surcharge; (c) that the holding of expiration be withdrawn; and (d) that no petition fee be required. The petition must state the date the insufficiency in payment of the maintenance fee and surcharge was discovered. The petition must also include a statement that the person who authorized or instructed that the maintenance fee and surcharge be paid was not aware of the fee increase. Such statement must be verified if made by a person not registered to practice before the PTO.

Petition under 37 CFR 1.183 should be directed to the Office of the Deputy Assistant Commissioner for Patents.

IMPROVEMENT TO SERVICES

•*Mail Processing Improvements —Preaddressed Incoming Mail*—In July 1989, a pilot program was established to determine the feasibility of providing preaddressed return envelopes and/or preaddressed labels with Office actions in order to provide faster and more accurate handling of responses. Four offices - a Trademark Law Office, a Patent Examining Group, the Patent Application Division, and the Assignment Division are involved in the pilot program. From July through September, each of these offices mailed out an envelope and a label with each office action for which a response is expected. A total of four thousand envelopes and labels have been mailed out. The envelopes and labels are a distinctive yellow color so that the PTO can readily sort them from other mail. Records of receipts will be analyzed to determine the responsiveness in using the envelopes or labels provided and the predominant preference of the two alternatives. The pilot will terminate in December. Thus far, the respsonse has been almost unanimously in favor of the program.

•*Trademark Minority Exhibit*— An exhibit focusing on black entrepreneurship in the 20th century was unveiled recently at the PTO. It features eight registered trademark holders whose accomplishments reflect the growth and diversity of Black-owned businesses in this century. The exhibit was developed collaboratively by the Assistant Commissioners for Trademarks and Administration. After an inaugural showing at the PTO, the exhibit was on display at a Blacks in Government meeting and will be available for other meetings and special events.

•*Voice Information System —Special Boxes*— Effective Oct. 1, 1989, The PTO began a four-month test of a prerecorded Voice Information System. The system will contain messages on special box designations within the PTO which enable the Mail Room to identify and sort mail at a faster rate. Use of the special box designations will result in a more efficient operation and provide better service to the public.

In order to reach the prerecorded message, callers should dial (703) 557-MAIL. The system will answer calls 24 hours a day, 7 days a week. If the service is determined to be useful to the public, it will be installed permanently with an additional referral feature that will allow callers who need additional information to be transferred to a Information Specialist in the Public Service Center.

HELPFUL HINTS

•*Appeal Briefs*—Briefs filed in cases where the notice of appeal to the Board of Patent Appeals and Interferences was filed on or after Sept. 12, 1988, must comply with amended 37 CFR 1.192(c) and MPEP Section 1206. 37 CFR 1.192(c) now requires that the brief contain at least the following headings, in the order indicated, and narratives as explained therein and elaborated upon in MPEP Section 1206:

(1) Status of Claims
(2) Status of Amendments
(3) Summary of Invention
(4) Issues
(5) Grouping of Claims
(6) Argument - Each issue presented for reveiw should be treated under the following headings, as appropriate:
  (i) 35 U.S.C. Section 112, first paragraph
  (ii) 35 U.S.C. Section 112, second paragraph
  (iii) 35 U.S.C. Section 102
  (iv) 35 U.S.C. Section 103
  (v) Other Rejections
(7) Appendix - A clean copy of the claims, preferably double spaced, involved in the appeal.

37 CFR 1.192(d) provides that if a brief is filed which does not comply with the requirements of paragraph (c), the appellant will be notified of the reasons for non-compliance and given a one month time limit within which to file an amended brief.

If the applicant does not file an amended brief within the one-month period, or files an amended brief which does not overcome all the reasons for non-compliance stated in the notification, the appeal will be dismissed.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.
